

Bracton PT Series

Now there is no need to compromise quality and performance for price! Introducing the Bracton Pass Through Series (PT), our high performance commercial dishwasher that ticks all the boxes.

Minimal Environmental Impact – Our machines are design specifically with the environment in mind, using less water, less electricity and less chemicals than the majority of our competitors.

Low Voltage Splash Proof Touch Pad – Say good bye to sticky buttons forever.

Superior Performance – The results from the Bracton dishwasher range are second to none.

Advanced Double Filtration – Clean filters, providing a superior finish.

Easy to Use – Auto fill. Auto start.

Advanced Technology – Bracton dishwashers and glasswashers have integrated many parts used in traditional machines, effectively reducing the number of moving parts greatly increasing reliability over the alternatives.

Quality Construction – Bracton uses brass valves and stainless steel AISI304 for body, wash arms and rinse tank – does yours? Many brands use brass arms and copper tanks that corrode over time as a result of contact with corrosive cleaning chemicals, leaving you with a larger repair bill than necessary.
