

# Dräger Saver CF Emergency Escape Breathing Apparatus

Now sold in Australia  
through Bracton Industries NSW

The Dräger Saver CF constant flow emergency escape breathing apparatus allows safe, effective and uncomplicated escape from hazardous environments with the minimum of user training. Extensive customer consultation and testing have been carried out to provide you with the ultimate hooded escape set.

#### **Automatic Activation**

The unit is automatically activated on opening the carry bag and can be simply re-set in the event of false alarm.

#### **Long Life Neck Seal**

The air hood neck seal is ozone resistant ensuring high levels of protection, even after storage.

#### **High Visibility**

The Dräger Saver CF is contained in an instantly recognisable orange carry bag, incorporating photoluminescent panels allowing the unit to be seen at very low ambient light and visibility level.

#### **Low Content Warning**

A warning sounds when the unit is nearing the end of its air supply.

#### **Low Cost of Ownership**

No mandatory routine service is required for a period of 10 years.

#### **Easy Inspection**

The cylinder contents gauge is clearly visible without any dismantling or adjustments to the unit due to a transparent viewing window located on the side of the bag. This allows for quick and simple cylinder contents inspection.

#### **Pneumatic Design**

Dräger Saver CF utilises a simple fail-safe reducer system with excellent flow characteristics giving a consistent air flow rate at all cylinder pressure levels. The combined diffuser and exhalation valve account for excellent air supply combined with a very streamlined hood profile.

#### **Fully Approved**

Dräger Saver CF provides breathing air for 10 to 15 minutes, according to cylinder size and is fully approved to AS/NZS1716 as required by Australian Standards (AS5034-2005).
