

Bracton Vision Series

The next generation in glasswashing technology

Bracton's Vision Series Glasswasher delivers all the water & labour features of the popular BR series, & more. Bracton have now included even more advanced technology, making their Vision Series the logical choice.

With over 30 years experience, Bracton is the clear choice for all your cellar & bar sanitation products.

Bracton set the standard for glasscare with the introduction of the *BR Series* Glasswasher in 2005. This machine enhanced glassware presentation using our proven Bracton Ready-To-Use, non-corrosive '8' 'Brewery Approved' glasswashing detergent, and became the top choice for industry leaders. The machine is recommended by breweries and was designed to improve the overall presentation of your beverages.

The *Bracton V Series* glasswasher is designed to make your glasswashing process as simple and easy as possible. Added features: specially designed transparent double-skin door, internal UV light colour, **UV clean check technology**- the UV light colour high lights if the glasses have been cleaned. Quickly and easily view progress, contents, or remove broken glass from within the machine- seeing the risk of injury.

The *V Series* glasswasher is equipped with Bracton's patented 3 minute soak cycle and has a top & bottom washarm. Designed for use with Bracton Pink Soaker, it alleviates the requirement of soaking and hand scrubbing tough stains manually. While significantly reducing manual labour costs, this process leaves the washed contents as well as the glasswasher, bacteria free.

The *Bracton V Series* is a re-circulating machine, meaning that only 2.5L of water is lost per cycle as opposed to the 7-15L lost through other machines, giving significant savings in water, electricity and chemicals. The *BR Series* pioneered this self-clean approach to glasscare, revolutionising the industry. Choose Bracton to receive the very best in glasscare technology. For specifications please refer to the *BR Series* brochure, available online through our website.

The future is clear. For more info on our technology please visit www.bractonbeerlineco.com.au
