

Bracton Industries, the premier suppliers for beerline cleaners with over 30 years experience are proud to release a significant breakthrough in Beerline Cleaning Detergents- the Bracton Low pH Beerline Cleaner.

Some of our clients

Panthers Group	Star City Casino
Harbord Beach Hotel	Churchills Sports Bar
Pittwater RSL	Royal Hotel Bondi
Palm Beach RSL	Northbridge Golf Club
Coogee Bay Hotel	Wagga Tafe College
Caloundra RSL	Hervey Bay RSL
Cessnock Bowling Club	Glen Innes Services Club
Central Coast Leagues	Cronulla RSL
Andale QLD	Royal Oak Hotel
Dingley Hotel	Merrylands Tavern
Birrong Sports Club	And over 2000 others!

Bracton Low pH Beerline Cleaner: The Safer Option

Bracton recommends substitution of our existing Bracton DP1 and DP2 Beerline Cleaner with our new innovative product to lower the risk assessment for Beerline Cleaning without compromise on quality results.

The pH of even the concentration at 11 (alkaline) is less aggressive on skin and tissue if accidental contact should occur. Precautions still need to be taken with concentrated form, however once diluted to the working solution, the low pH is rated in the same category as non-hazardous chemicals, alleviating dangers involved in accidental contact or consumption.

Bracton has tested and trialed this innovative product, in development for many years. With a recent focus on health and safety issues, we feel that this will become a significant substitution for hazardous chemical use. Quality and performance has always been part of the Bracton reputation, and accordingly Bracton Low pH Beerline Cleaner is approved by both CUB and Lion Nathan Breweries. Available in pack sizes of 12.5L Handipak, 15L set, 15L DP1 and DP2, and 24L DP1 and DP2.

Leading hotels, clubs and other venues agree that Bracton Dosatron Beerline Cleaning System (see over for info) is a safer and more effective way of reducing handling risks involved with Beerline Cleaning.

Bracton Low pH Beerline Cleaner is fully compatible with the current dosing system, and appropriate labels are available from Bracton Industries.

The Bracton Dosatron Beerline Cleaning System provides the best results for your venue. Put safety first with a less hazardous process. Bracton- the first choice for safety.

A Universal Principle

When connected to the water washout supply line, the dispenser operates without electricity, using water pressure as the power source. It's as simple as that. As the water flows through, it activates the dispenser, which takes up the required percentage of DP1 & DP2 direct from the container. Inside the dispenser, the DP1 & DP2 is mixed with the water, and the water pressure forces the solution downstream.

Once set, the dispenser requires no further attention. The dose of DP1 & DP2 will always be strictly proportional to the volume of water entering the dispenser, whatever variations in flow or pressure may occur in the main line. The dispenser's high metering accuracy is factory set and the system requires no further adjustment, alleviating any risk of overdosing.

Continuous dosing in complete safety

The Bracton Beerline Cleaning System (non-electric proportional dispenser) provides the perfect solution to beerline cleaning. On-site training and service contracts are available. Optional: Pin and Line Valve connection or B-Locks.

Increased Efficiency

- Solution is prepared instantaneously
- Dose of concentrate is proportional to water flow
- Dose remains precise, constant and regular

Enhanced Safety

- CO² can be eliminated during the cleaning process
- Hydraulic proportion eliminates incorrect dosing
- No electricity, reduced risk
- No direct contact with dangerous concentrates
- Environmentally friendly, limiting risk of pollution

Simple & Effective

- Easily fits in cellars and cool rooms
- Wall mounted
- Easy to use
- Labour costs reduced

Optional and Additional Accessories

- Safety Kit
- Mobile Trolley with facilities for chemicals
- 15 or 25L Drum Trolley
- Service kit
- On-site service and training courses
