

## ACB Series

### Engineered. Reliable.

The ACB Series is the first FDA approved air compressor in Australia with an epoxy internal coating. Ideal for food and beverage applications, the ACB series removes the chance of internal tank corrosion, vastly improving reliability by removing the most common cause of compressor failure. Engineered to be reliable.

### Automatic Drain.

Built-in auto drain is standard in all ACB air compressors, eliminating the need for staff to manual drain condensate from the tank.

### Silence is Bliss.

Designed to be almost silent in operation, the ACB series output of 53 - 55dB makes cellar operations quieter and safer.

#### Options

- Air Dryer
- Absolute silience cabinet

#### Certification

- TUV Medical CE
- TUV Industrial CE
- FDA Approved Device

#### Features

- Oil Less Operation
- Almost Silent Operation
- Thermal Safety Protection
- Low Maintenance - Long Service Life
- No Internal Corrosion
- FDA Approved epoxy coated internal tank.
- Multi Stage Air Filter -
- Warranty: 24 month parts
