

TO WHOM IT MAY CONCERN

Bracton Glasswash has been assessed by Carlton and United Breweries (CUB) and is approved for use as a machine **and** hand glass washing detergent in both hard and soft water.

Please note, however, that CUB has not undertaken (and is not in a position to undertake) any detailed analysis or testing of this material. Therefore, each person proposing to use this material must satisfy themselves that it is suitable for their purposes and use it at their own risk.

CUB may be quoted as being satisfied that the product meets the standards desirable in any product used to clean beer glasses and NOT as having recommended the use of the product.

CUB also reserves the right to assess the suitability of the product in commercial use and if not effective, when used as recommended, withdraw this approval.
