

APPLICATION SHEET

Product	Bracton Pink Soaker and sanitising powder
Description	<p>Fast acting soaking concentrate for the removal of stubborn stains from glassware, coffee cups, crockery, cutlery and food service equipment.</p> <p>Concentrated soaking and sanitising powder with descaling capabilities, remove residual build up from calcium, tannins, dairy and sugar based mixtures when mixed with water into a soaking solution.</p>
Safety	Refer to Safety Data Sheet and product label. Wear appropriate personal protective equipment.
Directions	When cleaning of food equipment and utensils follow soaking instructions.
Soaking	<ul style="list-style-type: none">• Dissolve 1 scoop of Bracton Pink per 15 litres of hot water.• Soak items in solution for 2 - 3 minutes.• Brush any visible build-up to release, allow additional soaking time if build-up not released.• Rinse well with fresh water. <p>Notes:</p> <ol style="list-style-type: none">1. For small items such as glasses and cutlery rinse through a glass-washing machine at a hygienic temperature to rinse.2. For heavy build up, soak for longer periods.
Glasswashing	Place glasses / coffee cups in the machine. Add one ½ (15g) scoop of Bracton Pink to the wash bay of the machine. Close the door; select the “Soak Cycle” and press start. The machine will wash for 3 minutes. Remove glasses/coffee cups and place on racking to dry. Add additional Bracton Pink every 5 washes.
Frequency	Frequency of cleaning shall be determined in accordance with AS4709-2001 ‘ <i>Guide to cleaning and sanitising of plant and equipment in the food industry</i> ’ Clause 2.2.
Standard Sizes	5 Kg, 10 Kg and 20 Kg.
Batch Numbers	Yes
